

QUICKI straight & branch off joint

The gel-filled cable joint technique is a new system with special advantages. It is quick and easy to install and reduces the chance of assembly errors. The impact-resistant case is connected by a hinge for easy installation.

The QUICKI cable joint is suitable as jointing and as branch-off. The cable joint comes with a 5-pole connector block included allen wrench. After closing the cable joint the special gel flows together and ensures a good sealing and insulation of the connection. After installation, the cable joint can be put directly in use.

No special tools required
Good adhesion to metals and plastics
Approved in accordance with EN 50393

Features

- UV-resistant
- Shells made of hit-proof, halogen-free PP
- With double-seal
- With 5-core screw connector block
- High temperature resistant GEL Type GQ, from -40°C to +140°C
- Tested according EN 50393 type 1 and 2
- In water, ground, outdoor and installation ducts
- For cables from 10mm diameter
- No special tools required
- Good adhesion on all surfaces
